

## Wake Forest NCORP Research Base Brief Study Proposal Template

### 1. Title Page

- Title of Study
- Date of Document
- Principal Investigator (Institution), Co-investigators (Institutions)
- PI's address, phone, fax and email address
- PI Research Base affiliation (if any)
- **Cancer Control** or **Cancer Care Delivery Research** (circle one)

NCORP definitions available here: <https://ncorp.cancer.gov/research/>

2. Schema: one-page diagram providing an overview of the proposed study. It should include (if available): sample size, study population (including key eligibility criteria), stratification factors, study design (randomization, case control, observational), specific intervention and control group(s) (if applicable), and data collection timepoints, including primary outcome
3. Study rationale (1-2 paragraphs)
4. How study findings will advance symptom science or cancer care delivery research, including the potential impact on clinical practice or future research (1 paragraph)
5. Primary and secondary study objectives
6. Primary and secondary outcomes
7. Brief description of eligibility or targeted population
8. Funding obtained or being pursued for study, if any

Proposal should be 2-3 pages in length. For grants to be submitted for funding, items 3-6 may be replaced by a Specific Aims page, if the requested information is included. Please submit proposal to [ncorp@wakehealth.edu](mailto:ncorp@wakehealth.edu).
